

Company Overview

US itek is a distinguished information technology services company based in Tonawanda, New York. Established in 1999 by David Stinner, the company has evolved from providing custom-built computer hardware to offering a comprehensive suite of IT services. US itek specializes in managed IT services, cloud computing, cybersecurity, compliance solutions, and VoIP systems, primarily serving small and medium-sized businesses in the Buffalo Niagara region, as well as educational and government institutions. citeturn0search9

Core Services

1. Managed IT Services

US itek offers proactive IT support and management, ensuring optimal performance and minimal downtime for client systems. Their services include network monitoring, system maintenance, and helpdesk support, tailored to meet the unique needs of each business.

2. Cloud Computing

The company provides scalable cloud solutions for hosting and data management, enabling businesses to access resources on-demand and enhance operational efficiency. Their cloud services are designed to be secure, flexible, and cost-effective.

3. Cybersecurity

US itek delivers advanced cybersecurity tools, including ThreatLocker, to protect clients against evolving cyber threats. Their comprehensive security measures encompass threat detection, prevention, and response strategies to safeguard critical business data.

4. Compliance Solutions

Recognizing the importance of regulatory compliance, US itek offers tailored solutions to help businesses adhere to industry-specific standards, particularly in sectors like healthcare and legal. Their services ensure that clients meet necessary compliance requirements, mitigating potential risks.

5. VoIP Systems

The company provides Voice over Internet Protocol (VoIP) systems, facilitating efficient and cost-effective communication solutions. Their VoIP services are designed to enhance connectivity and collaboration within organizations.

Industry Expertise

With over two decades of experience, US itek has developed a deep understanding of various industries, including healthcare, legal, and government sectors. Their expertise enables them to deliver customized IT solutions that address specific industry challenges and requirements.

Why Choose US itek?

- **Proven Track Record:** Recognized as one of the Top 100 Managed Service Providers by Cloud Tango in 2019, US itek has a history of excellence in customer satisfaction and service delivery.
- **Comprehensive Services:** Offering a wide range of IT solutions, US itek serves as a one-stop-shop for businesses seeking to enhance their technological infrastructure.
- **Client-Centric Approach:** The company prioritizes understanding and addressing the unique needs of each client, ensuring personalized and effective IT strategies.

Engagement & Partnership Models

US itek offers flexible engagement models, including long-term contracts and on-demand services, allowing businesses to choose the level of support that best fits their operational needs.
